

## BOMBARDIER

### Beijing

The city has announced the construction of a new north-south metro line in the western part of Beijing. The 18.3km line will have 15 stations and will connect World Park in Fengtai District with Capital Gymnasium in Haidian, via Beijing West station.

### The Hague

Successful trials have taken place of a quieter type of light rail track. Grooves are cut into a bed of open asphalt and cement into which embedded SA42 rails are laid. The technique reduces noise by 2dB and vibrations by 50%.

### London

Metronet is installing a new rollback protection system on London Underground.

an  
year.

### Nottingham

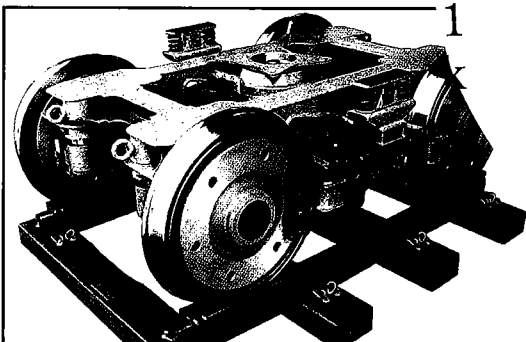

Nottingham (NET) is one of two urban rail systems involving Bombardier and one of the "next train stops".

### Rabat

Brussels will operate the line.
